Child & Babysitting Safety Class **GRADES 4-8**

The Child and Babysitting Safety (CABS) program from the American Safety and Health Institute gives everything you need to know for safe and successful babysitting. The YouTube "vlogger" style presentation of the video brings a youthful and high-energy spirit to the program content, and the colorful magazine format of the student book makes learning fun. From getting started with your business, to working with parents and children, to key safety, caregiving, and first aid tips, CABS will help set you up for babysitting success. Students must be present for the entire class and complete achievement of the core learning objectives to receive certification valid for two years. Instructor provides baby dolls, bottles, diaper supplies for skills participation. Students attend this class independently. Parents are encouraged to review the take home information and discuss it with their child.

WRESTLING CAMP **BOYS BASKETBALL (GR 2-3)**

See pages 30 -35 for more details!

Whatever you are looking for in the sport of fencing there is something for everyone! Fencing is a vigorous sport that develops stamina, quick reactions, speed, accuracy of movement and excellent coordination. More than a game fencing requires a mental attitude of self-discipline involving total manipulation of mind and body in perfect harmony. It utilizes natural body movement to create simple and effective selfprotection techniques with the sword. All participants are encouraged to have fun no matter what their ability. Attacking, defense, timing and intense tactics are all integrated into this beginning class. Whether you're fencing for a good work out, or gaining points for the Olympics, fencing is fun for the whole family. We provide everything needed to fence (mask, jacket, glove, and weapon). Fencers need only to come dressed comfortably for freedom of movement) including long sweat pants and running shoes.

For over 26 years, Science Explorers has been providing science enrichment classes in Minnesota and western Wisconsin. We believe hands-on science sparks wonder and imagination in all children and allows them to use their natural curiosity for discoveries. Join Science Explorers as we become crazy chemists! We will investigate the Periodic Table and learn about its families with fun and exciting experiments as we discover the science side of STEM. We will break some chemical bonds, get messy with polymers and much more. Our classes are hands-on...So be sure to dress for a mess!

Intro to Coding with Superheroes

GRADES 1-3 / Tech Academy

CREATE YOUR OWN VIDEO GAME! Love video games? Students as young as five years old can create their own platform video games in this cool class! Choose your storyline with favorite superheros as your stars. Add challenges and levels of difficulty, then share them by email or post them on the web to challenge families and friends. Now young student scan practice math, logic and programming and put their video game talents to work! The game will be in an animated Flash format, viewable in most internet browsers. Bring a jump drive to the last day of class, or files can be emailed to parents.

MN Swordplay Fencing \$ AGES 6+

Whatever you are looking for in the sport of fencing there is something for everyone! Fencing is a vigorous sport that develops stamina, quick reactions, speed, accuracy of movement and excellent coordination. More than a game fencing requires a mental attitude of self-discipline involving total manipulation of mind and body in perfect harmony. It utilizes natural body movement to create simple and effective selfprotection techniques with the sword. All participants are encouraged to have fun no matter what their ability. Attacking, defense, timing and intense tactics are all integrated into this beginning class. Whether you're fencing for a good work out, or gaining points for the Olympics, fencing is fun for the whole family. We provide everything needed to fence (mask, jacket, glove, and weapon). Fencers need only to come dressed comfortably for freedom of movement) including long sweat pants and running shoes.

Robotics Evolution

GRADES 4-8 / Youth Enrichment League

Using LEGO® Mindstorms software and LEGO® EV3 bricks and technology, students build a robot to deliver animals to safety, put cows out to pasture, reunite separated panda bears and more. In this year's Youth Enrichment League {YEL!} summer camp, our focus is on the FIRST® LEGO® League's challenges. Students will design, build, program, test and modify multiple robots using the LEGO® Mindstorms EV3 robotics system. Then use their team's robot to complete various challenges related to our animal friends. Our summer camp is designed to prepare students for participation in the FIRST® LEGO® League annual robotics competition. Put an end to summer brain drain.

Youth Tennis Lessons

AGES 7+

We offer a variety of tennis options for children ages 7-18 as well as adults. Our tennis lessons are designed to get beginning youth and adults playing tennis as quickly as possible. Lessons plans follow a logical progression of skill-building drills and games.

Beginner - For players who have little to no experience playing tennis. Students will learn each stroke from the very beginning and work on technique in a success-orientated environment. This class uses age-appropriate tennis balls.

Intermediate - For players who completed the Beginner class or has some playing experience. Concentration is on improving technique and learning how to control the ball. In class players focus on stroke production, learning to hit to specific targets and point playing experiences.

Advanced - Prerequisite: Beg/Inter Class or equivalent experience. Students will concentrate on court positioning, strategy and reviewing and improving their techniques. There will be "player sustained" drills which simulate match play.

Student Agency

An important idea woven into the district's Strategic Plan is *Student Agency*, defined as "students lead their learning."

We continue to work to find ways to bring students' voices and leadership into the forefront, with student representatives taking part on important district committees, student panels helping to define and design our future, and student leadership groups working on ways to tell their stories.

Students are providing their input in creative ways, as well. Student voice was captured recently in an "If I Built a School" video that was shared out with a Future of Learning Committee and the community as a whole.

Enjoy the video link below!

https://wi.st/2S2rh7i

We are excited that the important work being done by our students in these and many other ways will help guide our district's future moving forward.

Go Bears!
